Battery Safety
Finally Solved
SolidSafe™

Engineered with
Solid-State Technology
to reduce fire Risk

SolidSafe™ Magnetic Power Banks

BMX SolidSafe™ Magnetic Power Banks are engineered for safer, longer-lasting power. By cutting the flammable liquid found in standard lithium batteries and using solid-state cells, they offer greater resistance to heat, swelling, and failure, with a longer lifespan to match. Built for creators, commuters, and parents who don't compromise on everyday power.

- **Solid-state cells:** Fire-resistant design with reduced swelling and heat risk.
- **2x battery lifespan:** Outlasts typical lithium for daily reliability.
- **15W magnetic charging:** Up to 15W wireless for compatible devices.
- **USB-C 30W/27W in/out*:** Fast input and output charging.
- **Lanyard USB-C cable:** For fast wired charging or recharging on the go.
- **Full-color LED display:** Shows battery capacity and speed

*10K model only
